Soil Depth Metadata				
Feature Dataset	**Feature Dataset (Alias)**	**Sub-Layers Alias Name**	**Geometry Typre**	**Sub Layer Metadata**
Soil Type	Soil Type	Soil Depth	Raster	The Soil Depth dataset provides detailed information on soil depth across India, crucial for agricultural planning, irrigation design, and land use management. This raster dataset categorizes soil into different depth ranges, such as shallow, medium, and deep, helping to assess soil suitability for crop growth and water retention. Access to the dataset is subject to the Central Water Commission's policies.
